

SUJITH BATTU

Boulder, Colorado, USA | (+1) 720-869-0684 | battusujith2525@gmail.com

[Portfolio](#) | [linkedin.com/in/battu-sujith](https://www.linkedin.com/in/battu-sujith) | github.com/larry6683

EDUCATION

University of Colorado Boulder

Master of Science in Data Science | GPA: 3.75/4.00

Boulder, CO

Aug 2024 – May 2026

Delhi Technological University

Bachelor of Technology in Software Engineering | GPA: 3.70/4.00

New Delhi, India

Aug 2020 – May 2024

TECHNICAL SKILLS

Programming Languages: Python, SQL (PostgreSQL), R, JavaScript, C++

Data Analysis & ML: Pandas, NumPy, Scikit-learn, PySpark, TensorFlow, Matplotlib, Seaborn, Excel

Big Data & Cloud: AWS (EC2, S3), Google Cloud Platform (Cloud Run, Cloud SQL), Terraform, Docker, Kafka, Redis

Tools & Visualizations: Power BI, Tableau, GA4 Analytics, Git, Jira, ArcGIS

PROFESSIONAL EXPERIENCE

DME Connected

Data Analyst Intern - Marketing

Atlanta, USA (Remote)

May 2025 – Aug 2025

- Evaluated 10,000+ patient search requests by synthesizing EHR records using Python, Pandas, and SQL, identifying high-demand medical products and increasing sales by 40%.
- Unified marketing and sales metrics using LinkedIn Sales Navigator, Apollo, and HubSpot, improving lead identification efficiency by 25%.
- Constructed automated scraping pipelines to monitor competitor pricing and launch 5 new products. Designed interactive Power BI dashboards and performed geographic mapping using GA4, lifting conversion rates by 18%.

Delhi Technological University

AI Researcher - Image Processing

New Delhi, India

Aug 2023 – May 2024

- Processed and examined 5,000+ MRI medical images using Python, OpenCV, and NumPy for monkeypox detection.
- Executed preprocessing, feature extraction, and deep learning model assessment (ResNet50, EfficientNet), reducing false negatives by 15% and achieving 97% accuracy.
- Obtained the best accuracy among thirty relevant research papers, culminating in two publications in Scopus-indexed IEEE and AIP conferences.

Centre for Artificial Intelligence & Robotics

Research & Development Trainee

Bengaluru, India

Jun 2023 – Jul 2023

- Studied vehicle automation using LIDAR, ROS, and Autoware within the Intelligence, Surveillance & Reconnaissance division.

PUBLICATIONS

- **Deep Learning Assessment of Monkeypox Detection from Lesion Images** – *AIP Conference Proceedings (ICRAIC 2024)* | Scopus Indexed
- **Efficient Models for Detecting Monkeypox Using Skin Lesion Images** – *IEEE Xplore (ICIMIA 2023)* | Scopus Indexed
- **Bike Sharing Count Prediction using Machine Learning** – *IJARESM Journal (2023)* | UGC Approved

PROJECTS

Smart Travel Planning Application | *Next.js, FastAPI, PostgreSQL, GCP, Docker* 2026

- Engineered a scalable full-stack travel platform integrating external APIs to aggregate real-time metrics for flights, hotels, and weather.
- Architected cloud infrastructure on GCP using Terraform with automated CI/CD pipelines and built an AI chatbot to generate personalized itineraries, reducing planning time by 40%.

Registration Funnel Analytics (Capstone - Asante) | *UUID Tracking, Data Pipelines, Analytics* 2025

- Rebuilt a legacy analytics workflow with UUID-based tracking, pinpointing onboarding friction points to increase completion rates by 22%.
- Streamlined CSV reporting pipelines and formulated KPI dashboards, cutting manual reporting by 35%.

Real World Dashboard Evaluation | *Power BI, Excel, Data Analysis, Dashboard Design* 2025

- Transformed poorly designed charts into effective visualizations by applying core principles of information visualization and evaluating real-world data sets.
- Designed and deployed a live, interactive Power BI dashboard featuring high-quality visuals to streamline complex data interpretation.

Crop Recommendation System | *Machine Learning, Python, GIS* 2025

- Trained ML models predicting optimal crops utilizing soil nutrients and climate parameters, achieving 98% accuracy.
- Spearheaded GIS-ready architecture for spatial crop suitability mapping and precision agriculture evaluation.

GameVerse: Insights of Video Game Analysis | *Data Mining, Tableau, NLP* 2024

- Analyzed trends in the video game industry sourcing user reviews from SteamDB; performed developer analysis, genre prediction, and sentiment analysis to understand market dynamics.

Portfolio Maker | *React, Node.js, MongoDB, Software Testing* 2022

- Built robust MERN-stack and full-stack applications to run testing(A/B tests), performance evaluation metrics, and implement UI/UX design.

CERTIFICATIONS & ACHIEVEMENTS

- **Certifications:** GIS Specialisation (UC Davis - ESRI), HIPAA Certification, Process Data from Dirty to Clean, Supervised Machine Learning (Regression and Classification).
- **Leadership & Service:** Volunteered at multiple campus events (CU Boulder), former IEEE student member, Digital Media Team Lead for ENGIFEST, NSS Volunteer educating rural communities.
